## Approved For Release 2002/88/06: £14-RDP68B00724R000100220027-8

25X1A

	9141-69 Copy <u><b>5</b></u> of <u><b>5</b></u> 8 October 1969
MEMO	DRANDUM FOR: Director for Special Activities
SUBJI	Mr. Kissinger's Memorandum to President.  Subject: Air Reconnaissance of South China,
	25X1A 106, 265-69 B-1
seekin Mr. F	l. Per your instructions, I have contacted the following people g their comments on the subject paper being forwarded by rank Chapin:
25X1A	a. (OSR) - Concurs with paper as written.
25X1A	b. Mr. Proctor (Acting DDI) - Will have views ready subsequent to his meeting with (COMIREX) at 1530 today.
25X1A	c. (COMIREX) - Was out of his office until 1530 today. I will contact him when he returns.
25X1A	d. had the following comments which he offered to transmit officially. I told him I thought I could bring you his message without a formal paper:
	(1) "Paper does not seem crisp."
25X1D	(2) Paper is misleading in that no mention is made regarding photography comparison between U-2R and
	(3) He thinks that paper should state that either the or U-2R can react to breaks in the weather.

Giros 1 Excluded from culomatic Commodian and

25X1

we should avoid mention of statistical numbers.  He further stated: "If numbers are used they should be better qualified." The fact that operational failure of components is not included, etc., how many missiles are being fired in arriving at statistic, etc. His main concern seemed to be that we should be very cautious and not oversell the U-2R.  2. I will report and Mr. Proctor's reaction as soon as they have reviewed paper with me this p.m.  25X1  Chief, SAS/O/OSA  COORDINATED		_ Approved For Release 2002/08的话: 它IA-RDF68B00724R€00100220027-8	
what is meant by strategic recce, e.g., MRBM deployment, weapons related facilities, etc. In his opinion this addition would strengthen recce requirement and would help overcome State Department objection.  (5) "U-2R survivability seems overstated and might mislead the President." feels we should avoid mention of statistical numbers. He further stated: "If numbers are used they should be better qualified." The fact that operational failure of components is not included, etc., how many missiles are being fired in arriving at statistic, etc. His main concern seemed to be that we should be very cautious and not oversell the U-2R.  2.
